

MULTIPACK P50L

Adhesive tape bundling machine

The **MULTIPACK P50L** machine is designed to bundle with adhesive strips bottles, briks, packets, bags, cardboard or plastic boxes, soft or rigid standing.

This patented design offers long operating time.

The adhesive spool width corresponds to the adhesive strip length applied on the bundle.

MULTIPACK P50L

Adhesive tape bundling machine

FLEXIBILITY: suitable for a large range of products, adjustable adhesive strip position and width, application of printed and spotted or neutral adhesive spools.

OPERATING TIME: production time between spool change up to 10 times longer compared to standard adhesive spool solutions (spool width corresponding to adhesive tape strip width on the bundle).

SIMPLICITY: fast and easy formats change: just change adhesive spool to change format.

RELIABILITY: sturdy stainless steel construction, state of the art components, latest in servo drive technology.

EFFICIENCY: easy and trouble free operation (availability of min. 99%), low maintenance machine.

Technical specifications	MULTIPACK P50L
<u>Speed (per lane)</u>	Up to 60 cycles / min
<u>Number of lanes</u>	Up to 2
<u>Power supply</u>	3*400V / N / PE / 50-60Hz
<u>Installed power</u>	3,6 KW
<u>Machine dimensions</u>	2,200 x 1,200 mm
<u>Adhesive strip specifications</u>	- Length - Width - 3" spool mandrel
<u>Construction</u>	- Stainless steel - Painted steel (stainless optional) - Stainless steel and anodized aluminium - Polycarbonate

OPTIONS :

- Multi-formats
- 2nd spool holder
